

# Grant letter for initiating changes

Respected sir,

It is to bring to your notice that the people of responsibility at OSL have planned to take the action of installing open source linux distributions to all of the computers at the lab provided by the department which are currently working with enterprise softwares.

We planned this as the upcoming batch of fresher students are enthusiastic to work and learn at the lab and the best way we believe is through open source as the community holds up for it with success and innovation.

This decision is also motivated by many of the downside factors like improper use of softwares in enterprise OS due to which there has been significant performance loss in many of these systems, it can be avoided by running lighter versions of linux with better output.

There might arise some hurdles where if a student is in need to use enterprise software, we have decided to either guide them to use open alternatives in linux or consult you prior to installing the required softwares in the system.

Hence, we request your permission to let us take this initiative and convert all the operating systems at OSL to linux and duly sign the letter.

Thanking you
